Career goals

My goal is to work with software development, full stack, with a focus on back end and systems development. Most important to me is that I can continue to learn new languages and frameworks. I cannot get enough of learning new things or problem solving.

Main abilities

I am educated in and have experience with several programming languages and .NET. I also have a high capacity for learning new languages quickly. Some languages I have a lot of experience in are:

- C#
- JavaScript
- HTML5
- CSS3
- React
- SQL (T-SQL, MySQL)

Education

.NET-developer, KYH

Selection of courses:

- Web development (mostly React, JavaScript)
- HTML5, CSS3 and JavaScript
- Database technology (Asp.Net API, SQL, Entity Framework)
- Object Oriented Programming (C#, Razor)
- Systems development (XAML, C#)

Upper Secondary Diploma, Technology Programme (TE)

Selection of courses:

- Programming 2 (C#)
- Programming 1 (C#)
- Interface Design 1
- Web Development 1
- Computer Technology 1
